CONSULTING

THE WAY IT SHOULD BE

Welcome to Kearey Consulting IT support solutions

Given the absolute importance of your business IT systems, it is paramount that you select the right partner to work with your business ensuring you receive the best possible performance and technology guidance available.

With all the IT consultancy and support companies out there, choosing the right one to work with can be quite a difficult decision. Our services are focused on your company's success and smooth running of your systems. This, coupled with a dedicated, experienced and customer service focused team, means our support is unparalleled.

Kearey Consulting Limited is an IT consultancy based in More London, London. The company was founded by Christopher Brendan Kearey in 2004. Our main focus since incorporation has been to offer our customers the best possible customer service with industry leading consulting and support, as well as to improve our customer's systems, ensuring reduced costs and higher efficiency.

Kearey Consulting has experienced steady growth owing mainly to recommendations from existing customers and word-of-mouth referrals. Our customers' willingness to recommend our services supports our dedication to offering unparalleled service. We take pride in going out of our way to accommodate and assist our customers no matter what the time, situation or pressures involved.

The dedication of company management is reflected

throughout the company with every member of staff sharing the same ethos and customer service dedication. Finding a team and staff who share these values has been worth the effort as we will never compromise on our values.

Our technicians are involved in ongoing training and certified through our leading software and hardware partners. We are constantly at the forefront of leading technologies and offer reputable services including IT support, VoIP and Telephony, Networking and infrastructure, Cloud Solutions, Security and Compliance.

Understanding the direction of our partners' technologies, and how best to apply these to our customer scenarios, ensures we are able to offer the best support to our customers. IT is always changing and we will endeavour to remain ahead of the game in every respect.

Services

Our Services

We offer our customers a complete set of IT infrastructure and Support services which we take pride in ensuring are effective, value for money and best in class. Our IT solutions and support will provide you with an effective, customer focused, and high level of IT service.

We pride ourselves on prompt response times, approachable, accessible staff and personalised service each and every time.

Your systems need to serve your business goals and requirements, and we understand that this is different for every business and set of IT systems. We will assist in understanding your current systems status and issues and align this with your business requirements and propose an open and honest assessment and solution to meet these needs.

We will always focus on the best possible outcome for your business, as your success is our success. We practice complete transparency and honesty with all our customers and believe in trust and long term relationships, not short term gains.

Cloud Solutions

The cloud has revolutionized the way businesses work and collaborate with each other. Putting your IT in the Cloud means you can:

- reduce your costs
- improve your systems accessibility
- simplify your systems management

We partner with the industry leaders in cloud technologies to ensure we can offer your business the best possible solution to meet your needs. Our extensive training and experience with the best of breed cloud services affords us the capability to build best-in-class cloud solutions for our customers.

VOIP and Telephony

Your business no longer needs to rely on cumbersome, expensive, difficult-to-deal-with monopolies to meet your business telephony needs. VoIP can revolutionise the way your business communicates!

VoIP telephony in your business can deliver massive cost savings, increased flexibility and easier administration.

As a hosted VOIP provider we are able to offer your business all the benefits of a corporate phone system at a fraction of the cost of a traditional phone system. With minimized capital outlay and huge flexibility, a cloud telephony system offers huge advantages over the traditional on-premise systems.

Services

IT Support

Given the absolute importance of your business IT systems, it is paramount that you select the right partner to work with your business to ensure that you receive the best possible performance and technology guidance available.

We focus on the smooth running of your systems, ultimately providing added value, cost effectiveness and high ROI for your business. This, coupled with a dedicated, experienced and customer service focused team, means our support is unparalleled.

Due to their critical business nature, it is important that your IT systems are monitored in real time and any issues are detected, reported and dealt with immediately. 80% of the issues raised by our customers or remote monitoring are dealt with using instant remote support technologies and are resolved well within agreed service level agreement (SLA) times. This allows you to concentrate on your business and not your network infrastructure.

We offer completely tailored services based on your business needs and goals. We are also able to provide a complete managed IT services experience or support to your existing IT team.

Compliance

If you have a business responsibility to maintain compliance with an external body, we can help. We have, over the years, assisted a large number of our customers to formulate a relevant, concise and documented IT compliance strategy.

Whether your compliance is internally or externally audited, failure to comply with the requirements of your regulator can have a catastrophic effect on your business, its reputation and even worse – your customer data!

Through our years of experience in this field, we have formulated an easy-to-implement system, based on the compliance requirements, data held and business function.

We have helped our customers achieve regulatory compliance and peace of mind in this regard for many years. We cover all areas of IT infrastructure including, but not limited to: External supplier contracts, Roles and responsibilities, Service level agreements (SLAs), IT Support, Systems change control, Logging and monitoring, Policy creation and review, Asset monitoring, Encryption and security, Backup and DR.

 *Thank you for all of your support lately; you've really helped me out of a few sticky situations and I really appreciate how quickly you've turned things around when things started going wrong."*

- Head of Operations, Educational Consultants, London

Services

Infrastructure

An efficiently designed and maintained network infrastructure will ensure your systems, cloud services and applications run at their best. With a vast amount of experience and carefully selected supplier partnerships, we enable our customers to make IT infrastructure decisions best suited to their business needs.

Our infrastructure skills include:

- Server Hardware
- Storage Solutions
- Virtualization
- Switching infrastructure
- Security and Firewalls
- Anti-Virus
- VPNs
- Cloud integration
- Single Sign On
- Fibre, Leased Lines and DSL Internet connectivity
- Hybrid cloud connectivity
- Backup Solutions
- Disaster Recovery Solutions
- High Availability
- Remote Working solutions
- Hosting solutions (virtual and physical)

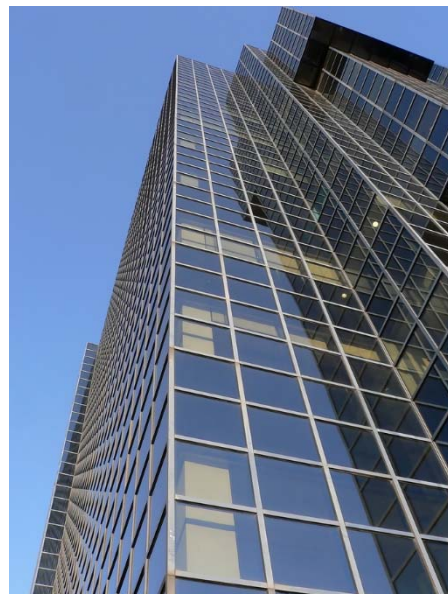

We can help your business grow without the hassle of having to worry about your infrastructure. We will carefully assess your business requirements and help you build an infrastructure solution to meet your current and future needs.

Why choose us?

We are really confident in what we do and what we can provide to your business. Short of bragging, we know that through partnering with Kearey Consulting, you can be assured what you will be receiving the very best IT support services. We care about your business and we are committed to working with you to provide you with the best value for money from your IT.

We can offer you completely tailored services based on your business needs and goals offering a complete managed IT services experience or extra assistance to your existing IT team.

Should your business need an IT consultant, assistance with your IT security or just the best IT support available, you've come to the right place.
